SOFFIT

Prominace the Mothership

Our extensive presence across India and cutting-edge manufacturing capabilities are enhanced by a growing network. Global window manufacturers are joining forces with us, attracted by our renowned commitment to delivering the utmost quality standards. At the core of Prominace lies a philosophy grounded in simplicity, agility and a profound understanding of our users' requirements.

At Uniceil, we enthusiastically embrace and champion innovative thinking, formulating solutions that surpass conventional architectural boundaries. This commitment ensures that each project becomes a masterpiece of both functionality and design, whether in ceilings or walls.

About Uniceil

UNICEIL
WALL · CEILING · FACADE

In the dynamic realm of architectural aesthetics, Uniceil takes the lead, exemplifying precision, performance and an inventive mindset. Every item we carefully select goes beyond being a mere product, it's the intersection of engineering and artistry. At Uniceil, our approach transcends conventional space design; we metamorphose them, establishing standards in excellence and meticulous attention to detail. Step into a realm where design brilliance is not only crafted but also meticulously engineered to perfection.

Commitment to Craftsmanship

Each Uniceil product represents a commitment to excellence, durability and unmatched aesthetics. As advocates for the contemporary architectural movement, we pledge to uphold excellence at every stage, spanning from design to installation.

Crafting Excellence Every Step

Sourcing of Raw Materials

Uniceil's commitment to excellence begins with our careful selection of the finest, plasticiser-free PVC resin, ensuring both robustness and refinement.

Finish & Configuration Flexibility

Uniceil's commitment to modern design is reflected in our versatile palette of colours, finishes and configurations, seamlessly integrating with any space while delivering exceptional performance.

Quality Assurance

At Uniceil, each product undergoes rigorous quality checks, upholding our 'top-of-the-line' motto to guarantee that every system surpasses global excellence standards.

Crafting Excellence Every Step

Eco-Conscious Manufacturing

Uniceil prioritises a greener planet through eco-conscious manufacturing, proudly utilising 100% recyclable uPVC to demonstrate our commitment to environmental responsibility.

Commitment to Technological Excellence

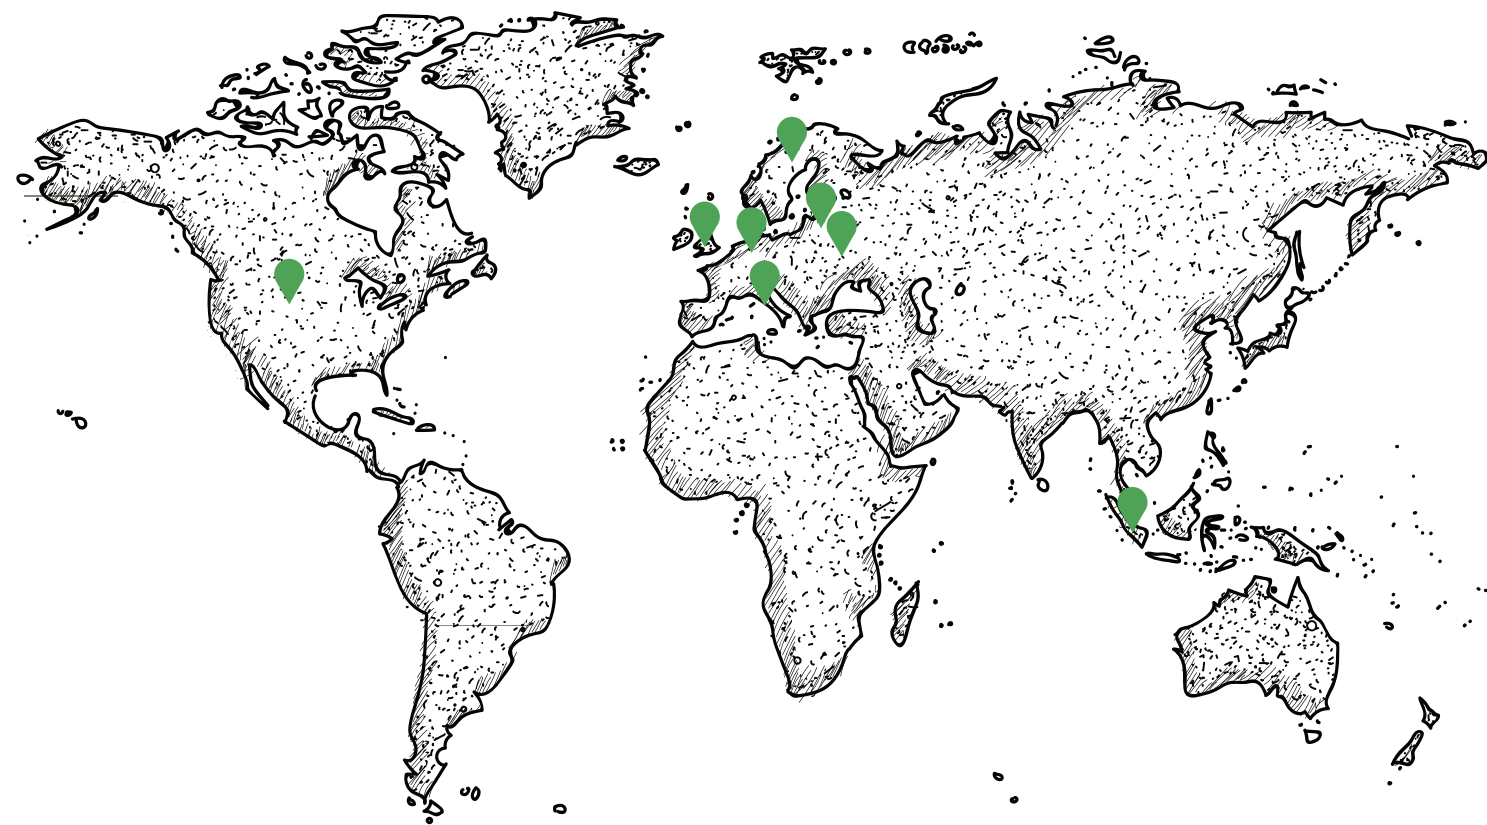

Uniceil products are meticulously crafted using cutting-edge technology within a highly organised system. Our commitment to excellence extends to our integrated lighting systems and functionality, all rigorously inspected to meet and exceed the highest industry standards.

Exceptional Durability

Uniceil products are built to last, designed for an impressive 25,000 hours of artificial weathering.

UV-Resistant Excellence

Extreme UV Resistant with none-of-its-kind durability in exterior and interior applications.

Building Blocks

Quality begins at the source and at Uniceil, it is an unshakable commitment. Our raw material selection is a testament to our dedication to excellence. The formulation of our uPVC stands as the pinnacle of engineering excellence. We leave no room for compromise, with each material undergoing rigorous scrutiny and extensive research.

Diving deep into the molecular structure, we've achieved a blend that optimises mechanical and thermal properties. This results in products that not only boast extraordinary strength and durability but also demonstrate impeccable resistance to thermal expansion and contraction, an absolute necessity in the face of ever-changing climatic conditions.

Our approach to sustainability is non-negotiable. While others may sacrifice ecological considerations for performance, our uPVC composition strikes a harmonious balance. This eco-centric approach ensures reduced carbon footprints without the slightest compromise on quality or performance.

In the realm of architectural engineering, where materials gets easily replaced, our uPVC composition shines as a beacon of excellence. It's more than just a blend of materials; it's a synergy of engineering brilliance, ecological responsibility and distinguished performance.

We source only the best, globally renowned additives for our uPVC profiles. TiO₂ for UV resistance, fillers of the highest grades for whiteness, impact modifiers, processing aids known for their strength and gloss levels and non-lead stabilisers to enhance processability and weather resistance.

Features

The Uniceil seamlessly combines the authentic appearance of real wood with cutting-edge modern technology in its Uniceil Ceiling System.

Real wood
feel

Fire-retardant

Easy to install

Seamless post
installation

Lightweight

Maintenance-free

Rust proof

Functionality

Panels with a wood-like colour provide a cost-effective substitute for pricier wooden panels. Uniceil Ceiling System is weather-resistant and maintenance-free, ensuring enduring delight in aesthetics of any space, while also saving both time and money.

Usage & Advantages

1. Uniceil Ceiling System provides a finished and polished look to the underside of architectural elements, contributing to the overall visual appeal of a structure.
2. Uniceil Ceiling System often contains vents to allow air circulation in the attic or roof space. Proper ventilation helps regulate temperature and moisture levels, preventing issues such as mould and mildew.
3. Uniceil Ceiling System protects the roof and building from the elements, including weather, pests and debris.
4. Adequately designed Uniceil Ceiling System can contribute to energy efficiency by facilitating proper airflow, reducing heat build-up and improving insulation performance.
5. Uniceil Ceiling System can be designed to be low-maintenance, saving homeowners time and effort in upkeep.
6. Uniceil Ceiling System is a versatile element that can be used to enhance the architectural style of a building. It comes in various materials and finishes, allowing for creative design options.
7. Utilising panels in interior spaces like bedrooms and living rooms adds a distinctive and cosy touch.

Chest Nut

White

Installation Methodology

Connecting the trims

The overlapped edge trim connection allows for expansion and contraction in response to thermal variations.

Installation of Soffit elements to a supporting structure

Soffit elements can be mounted to a simple supporting structure by means of corrosion-protected screws (minimum length 20 mm and minimum head size 8 mm).

Slotted mounting holes

The screws should be driven perpendicularly to the ceiling in the middle of slotted mounting holes leaving around 1 mm clearance (in order to compensate for temperature-related length variations).

Installation of ceiling boards

Cutting the ceiling boards to length

Ceiling boards must be cut to length in such a manner that the trims have 5 mm clearance to compensate for temperature-related length variations.

Interlocking joints

Subsequent boards must be fixed to previously mounted ones.

The interlocking seamless joints not only enhance the aesthetic appeal but also contribute to the overall strength.

Installation of perforated ceiling boards

Placing the perforated Soffits at a specified distance allows increased airflow and ventilation.

Installation of Interconnecting Trim

Location of an interconnecting T trim

Use T trim for a quick and effective solution when completing Soffit panel joints.

There are two methods of finishing a Soffit ceiling in building corners, using Interconnecting T trim.

Installation of Inner & Outer Corner Trims

Location of outer corner trim

The inner and outer corner trims facilitate the installation of the Soffit in various roof structures. These components provide an opportunity for enhancing the aesthetics of internal and external edges of the roof Soffits, as well as the corners of protruding roof purlins.

Choosing Excellence

Discover patent-protected designs in Wall, Ceiling and Facade System that fluently integrate lighting elements, enriching your ambiance. When it comes to uplifting your spaces, you need an expert and that's where we come in.

The impact of lighting: Underwhelming lighting doesn't just dim spaces; it affects health, productivity and learning. Our Wall, Ceiling and Facade Systems ensure optimal lighting both direct and indirect, harmoniously merging aesthetics and functionality.

Innovation at its best: Our dedicated R&D team has meticulously crafted a system ensuring swift and smooth installations.

Commitment to quality: With raw materials of the highest grade sourced globally, compromising on quality isn't in our vocabulary.

More than just suppliers: We're not just product providers; we're solution specialists. Our mission is to collaborate closely with all stakeholders, crafting bespoke solutions that strike the perfect balance between design and utility.

Setting the Gold Standard

In the world of architectural innovation, while many strive for excellence, Uniceil effortlessly embodies it. Our commitment to using advanced materials, fused with our passion for impeccable design, ensures a product range that not only lasts but thrives.

In essence, our distinction isn't just in what we do; it's in how impeccably we do it, setting benchmarks that become the industry's gold standard. With Uniceil, you're not just choosing a product, you're aligning with a legacy of unmatched architectural brilliance.

Setting new standards in elegance, functionality and design flexibility. We redefine spaces, infusing them with second to none sophistication and versatility.

But what truly sets us apart?

Uniceil Linear System is a high-end architectural solution that is suitable for a wide range of projects, from public spaces like airports, metro stations, private homes and vacation homes. It can also be used in institutions, theaters, healthcare facilities, hotels, resorts and government buildings.

It's our unparalleled synthesis of expertise, innovation and dedication that others find challenging to replicate.

While many may tread the path of architectural advancements, the finesse and perfection Uniceil brings to the table remain unrivalled on a global scale.

Seals of Superiority

Global recognition for our unfaltering quality.

Our profiles boast accreditation from renowned institutions worldwide, including SKZ-Germany, TUV and IFT-Germany.

Sourced from the US, Europe, Japan and the UK, our highest quality raw materials have demonstrated over six decades of global performance.

Our system excels with unique features such as dielectric strength, load-bearing capacity and screw-holding strength. With zero water absorption and resistance to oxidation, our profiles thrive in harsh external environments, making them ideal for high humidity and coastal areas.

Versatile and customisable, our system accommodates various accessories, with concealed provisions for wires and cables. Exclusive brackets designed for smoke detectors, fire alarms, CCTV cameras, signage and other services suspend seamlessly from the ceiling.

Our system is the perfect solution for addressing issues associated with conventional ceiling systems which are prone to ageing, discolouration and recoating.
